

OPTIMIZING YOUR IMMUNE SYSTEM

3 prominent doctors. 1 shared professional opinion.

DR. LUC MONTAGNIER

- Winner of the 2008 Nobel Prize in Medicine for his discovery of the human immunodeficiency virus (HIV) with Françoise Barré-Sinoussi in 1983.
- Co-founder of the World Foundation for AIDS Research and Prevention.
- Made many significant discoveries concerning the nature of viruses.
- Contributed to the understanding of how viruses can alter the genetic information of host organisms.
- His work has significantly advanced cancer research.

As one of the world's experts in the field, Dr. Montagnier is a contributing Editor of the book "Oxidative Stress in Cancer, AIDS, and Neurodegenerative Diseases" where a complete chapter is devoted to Immunocal[®] and where it states that:

“Glutathione is of major significance in cellular antioxidant activity, and that Immunocal functioning as a cysteine delivery system can enhance glutathione synthesis . . .”

DR. JAMES F. BALCH

- Graduated with honors from the University of Indiana School of Medicine.
- Spent over 30 years as a urologist in private practice before devoting his career to nutritional healing.
- Member of the American Medical Association, the American College of Surgeons, and board certified by the American Board of Urology.
- Is recognized as a prominent authority on nutrient healing.
- Is author of several books including the best seller, *Prescription for Nutritional Healing*.

“It's my opinion that everyone should be taking Immunocal. Today, there's no better way to boost your immune system.”

DR. WULF DRÖGE

- A world renowned research scientist and Senior Vice-President, Research & Development, Immunotec Inc.
- Has over 250 publications and is internationally known in the field of redox physiology and aging research.
- Has over 40 years of active experience in basic and clinical research.
- For almost 30 years he served as professor of immunology and cell biology at the University of Heidelberg and head of the Department of Immunochemistry at the National Cancer Research Center of Germany.
- Was the first to describe the effect of glutathione on the immune response.

“Many studies of my laboratory at the *German Cancer Research Center* support the conclusion that Immunocal is effective in maintaining a strong immune system . . .

“Through its special structural properties, Immunocal overcomes a cellular deficiency that is most commonly seen in old age . . . This deficiency affects most notably the cells of the immune system and is associated with an increased incidence of infections. Elderly people are therefore the first to feel the benefits if regularly consuming Immunocal . . . young people are well advised to also consume Immunocal regularly. It is good advice to be prepared at all times.”

Immunocal[®] helps to maintain the body's natural defenses against disease, environmental challenges and the signs of aging.
